

**BINARY FROSTER**

// CLIENT COMMAND PORTAL V1.0

OFFICIAL ONBOARDING SPECIFICATION

Client Platform Onboarding Handbook

A comprehensive functional guide and reference manual for clients, sponsors, and engineering stakeholders navigating the Binary Froster portal.

Binary Froster Portal: Client Onboarding & Platform Handbook

Welcome to the Binary Froster Client Experience

Target Audience: Client Executives, Project Sponsors, Technical Leads, and Stakeholders

Platform Version: Production Portal V1.0

Visual Assets: Full HD High-Fidelity UI Reference Captures

1. Executive Welcome & Platform Architecture

Welcome to **Binary Froster**. Our client delivery portal is an enterprise command center designed to provide complete transparency, cryptographic security, and real-time collaboration throughout your software engineering engagement.

1.1 Core Principles of the Portal

- **Zero-Guesswork Transparency:** Track sprint velocity, code deliverables, and project phases in real time.
- **Cryptographic & Legal Governance:** Execute legally-binding NDAs and MSAs via an embedded e-signature engine compliant with the ESIGN Act.
- **Direct Engineer Access:** Communicate directly with founding partners (*Shivam Dube, Digvijay Kadam, Jawad Khan Hakim*) without intermediary account layers.
- **Unified Treasury & Billing:** Settle milestone invoices through encrypted Stripe and Razorpay checkouts with instant automated receipts.

BINARY FROSTER PORTAL			
1. SPEC & SCOPE	2. ENGINEERING	3. SIGN-OFF	4. HANDOVER
• Proposals	• Sprint Board	• Deliverables	• Repos
• Change Reqs	• File Vault	• E-Signatures	• SLA Monitor
• Onboarding	• Telemetry	• Invoices	• Runbooks

1.2 Client User Roles & Authority Tiers

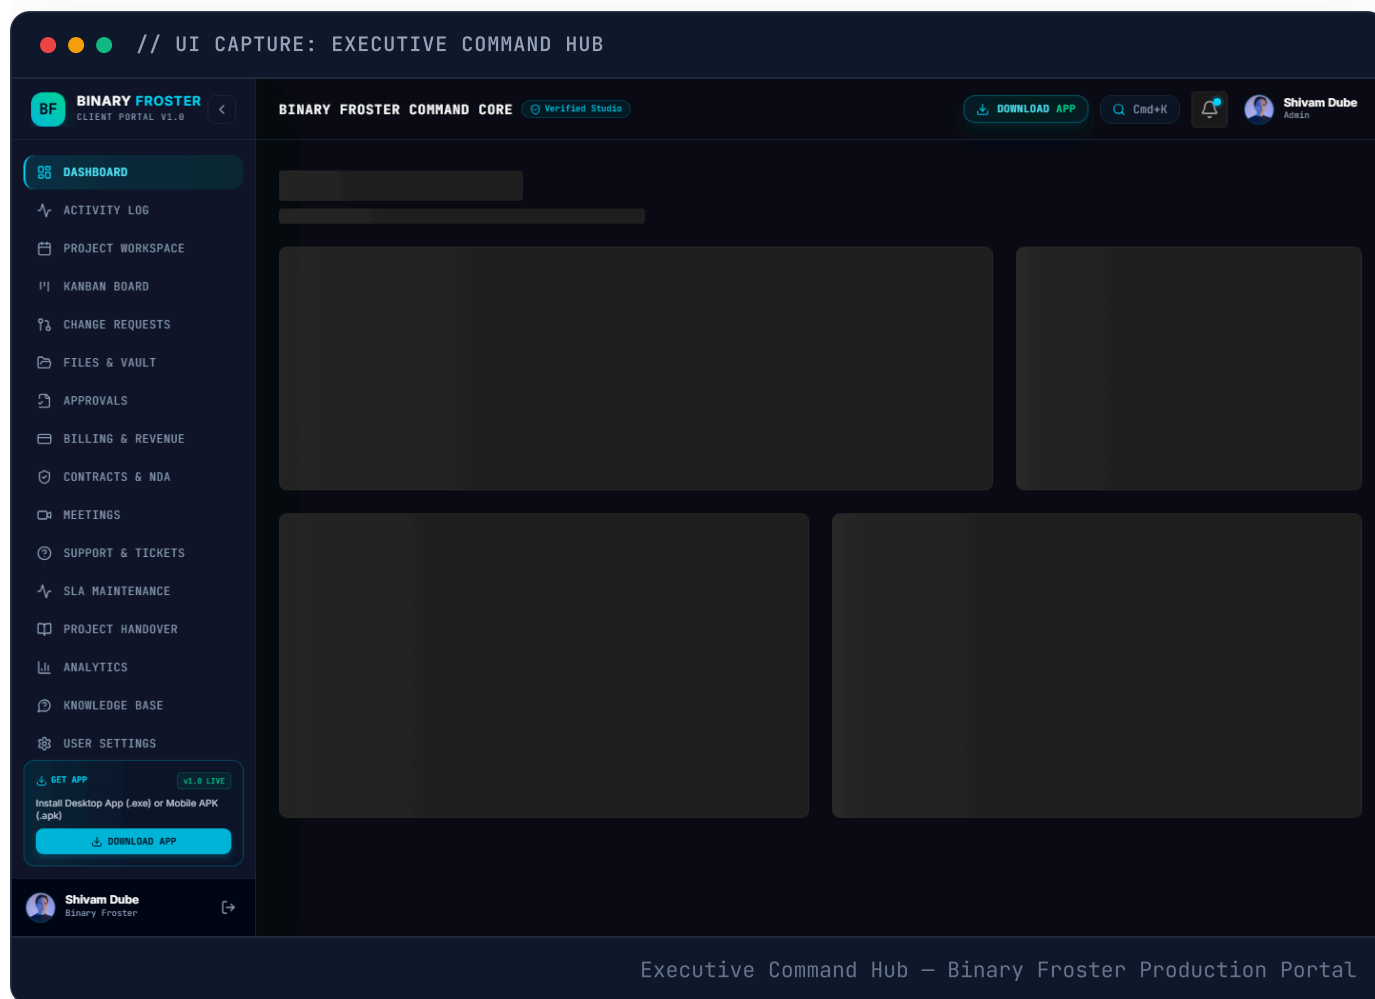

Your organization is provisioned with tiered roles to ensure appropriate security and decision-making authority:

ROLE KEY	TYPICAL TITLE	AUTHORITY & CAPABILITIES
client_admin	CEO, CTO, VP Engineering, Product Sponsor	Full Client Authority - Sole legal signatory for Master Services Agreements & NDAs - Authority to execute invoice payments via Stripe/Razorpay - Formal sign-off on phase deliverables ([Approve & Lock]) - Authority to approve Scope Change Requests
client	Project Manager, Technical Lead	Collaborative Access - Move task cards & submit technical feedback - Download code artifacts & design assets - Request revisions on staging deliverables - Book review meetings & submit SLA tickets
client_user	Team Member, Stakeholder	Read-Only / Review Access - View milestone progress and burndown telemetry - Inspect approved deliverables and knowledge base runbooks - Join scheduled review video calls

2. Complete Page-by-Page Guidance & Functional Specifications

2.1 Executive Command Hub (</dashboard>)

The **Dashboard** serves as your daily landing hub, summarizing project velocity, active sprint progress, and pending approvals at a single glance.

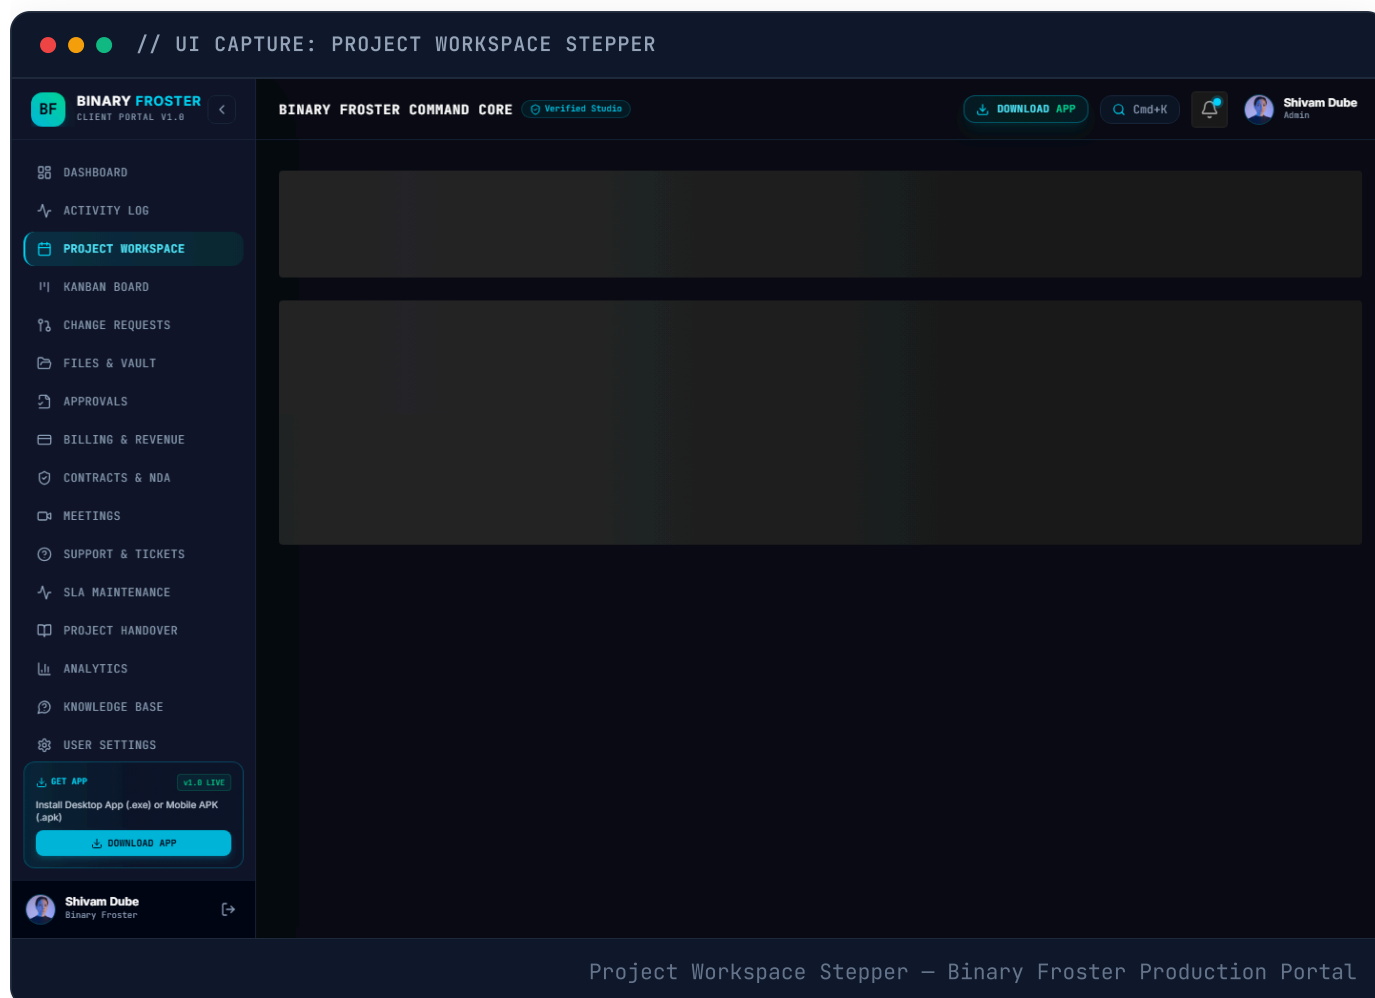

Key Functionalities:

1. **6-Phase Telemetry Ring:** Displays exact completion percentage across your overall project roadmap.
2. **Upcoming Milestone Callout:** Highlights the next critical delivery milestone, target date, and days remaining.
3. **Pending Approvals Queue:** Prominently alerts you to deliverables awaiting client review.
4. **Active SLA Status:** Verifies that your 24/7 technical monitoring and response guarantee is operational.

2.2 Project Workspace & 6-Phase Lifecycle ([/project](#))

Binary Froster projects follow an engineered 6-phase delivery methodology: **Discover** → **Design** → **Build** → **Test** → **Launch** → **Support**.

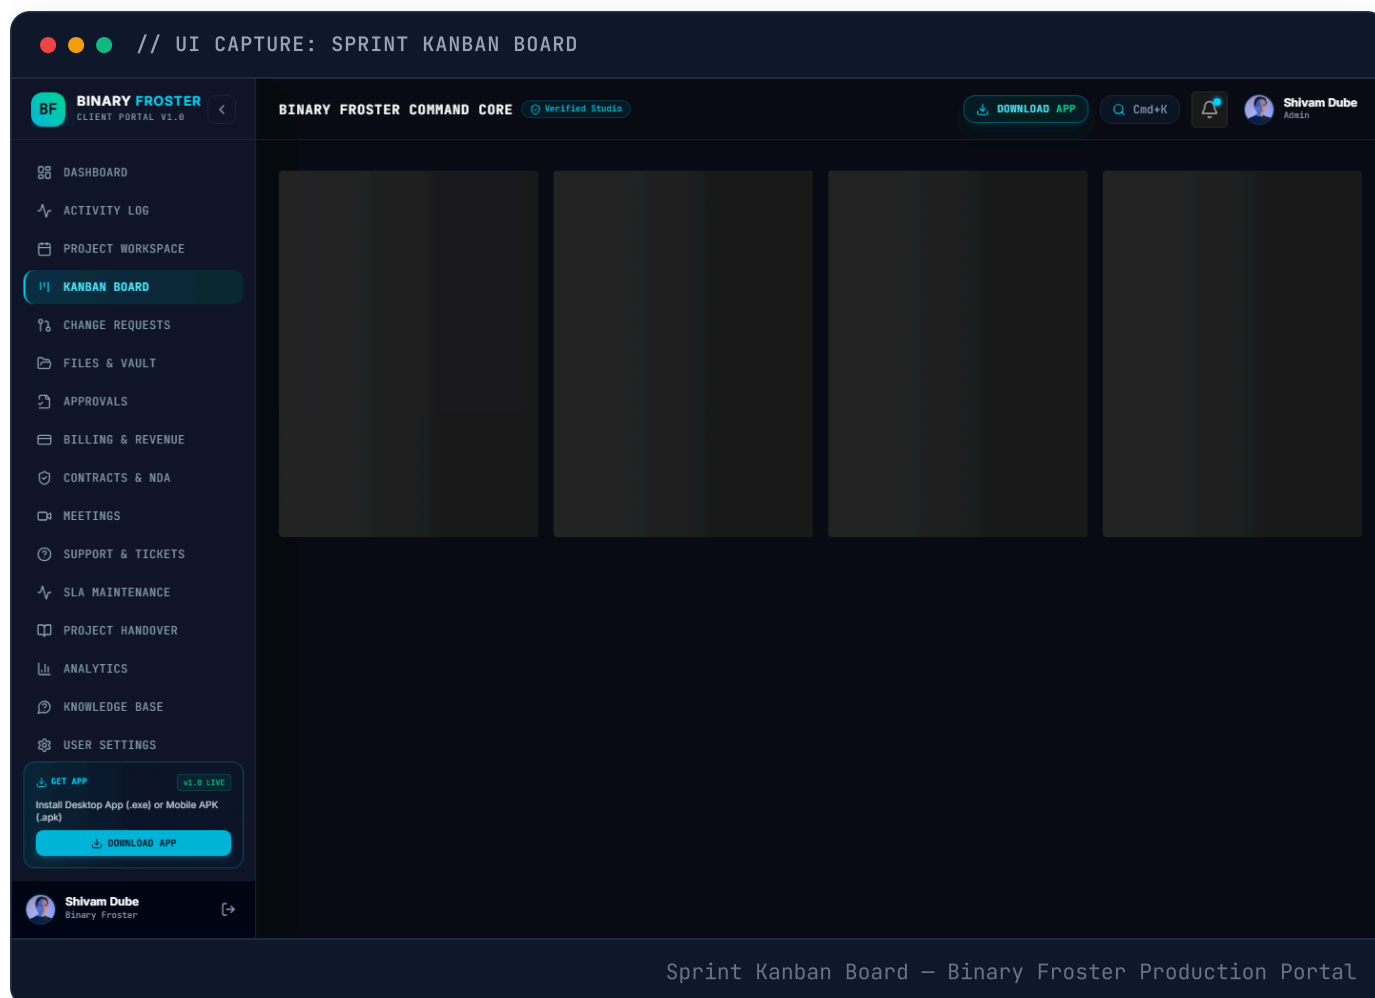

Key Functionalities:

1. **Interactive Phase Stepper:** Click any phase to inspect associated sprint tasks, deliverables, and completion timestamps.
2. **Milestone Progress Cards:** Review technical milestones with granular progress bars and target completion dates.
3. **Phase-Locked Delivery:** Ensures no phase proceeds into production without explicit sign-off from your team.

2.3 Sprint Kanban Board (/tasks)

Track feature engineering in real time using our dark luxury Kanban board, synchronized with live engineering commits.

Key Functionalities:

1. 4 Column Workflow:

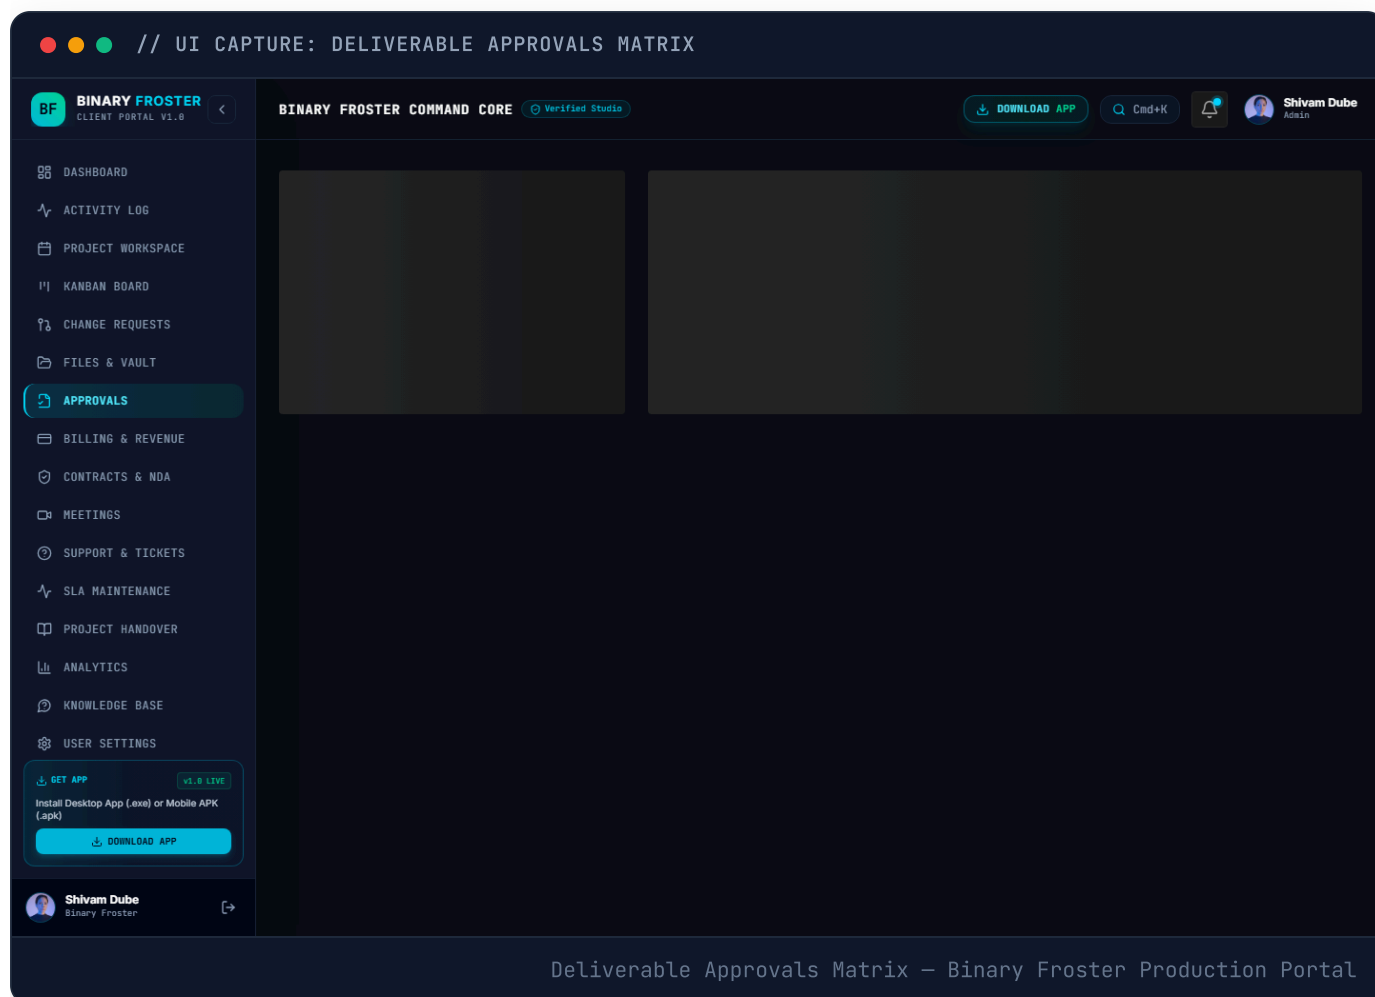

- Backlog : Upcoming user stories and architectural specs.
- In Progress : Features currently under active development.
- Review : Deliverables staged for client inspection and testing.
- Completed : Verified and signed-off engineering modules.

2. Card Details & Task Feedback: Click any task card to inspect assignees, priority chips, tags, and submit inline revision feedback.

3. Quick Status Transitions: Authorized client leads can mark tasks done or transition items into review.

2.4 Deliverable Approvals & Sign-Off Matrix (/approvals)

The formal gate for inspecting software releases, design systems, and compliance audits before code is merged into production.

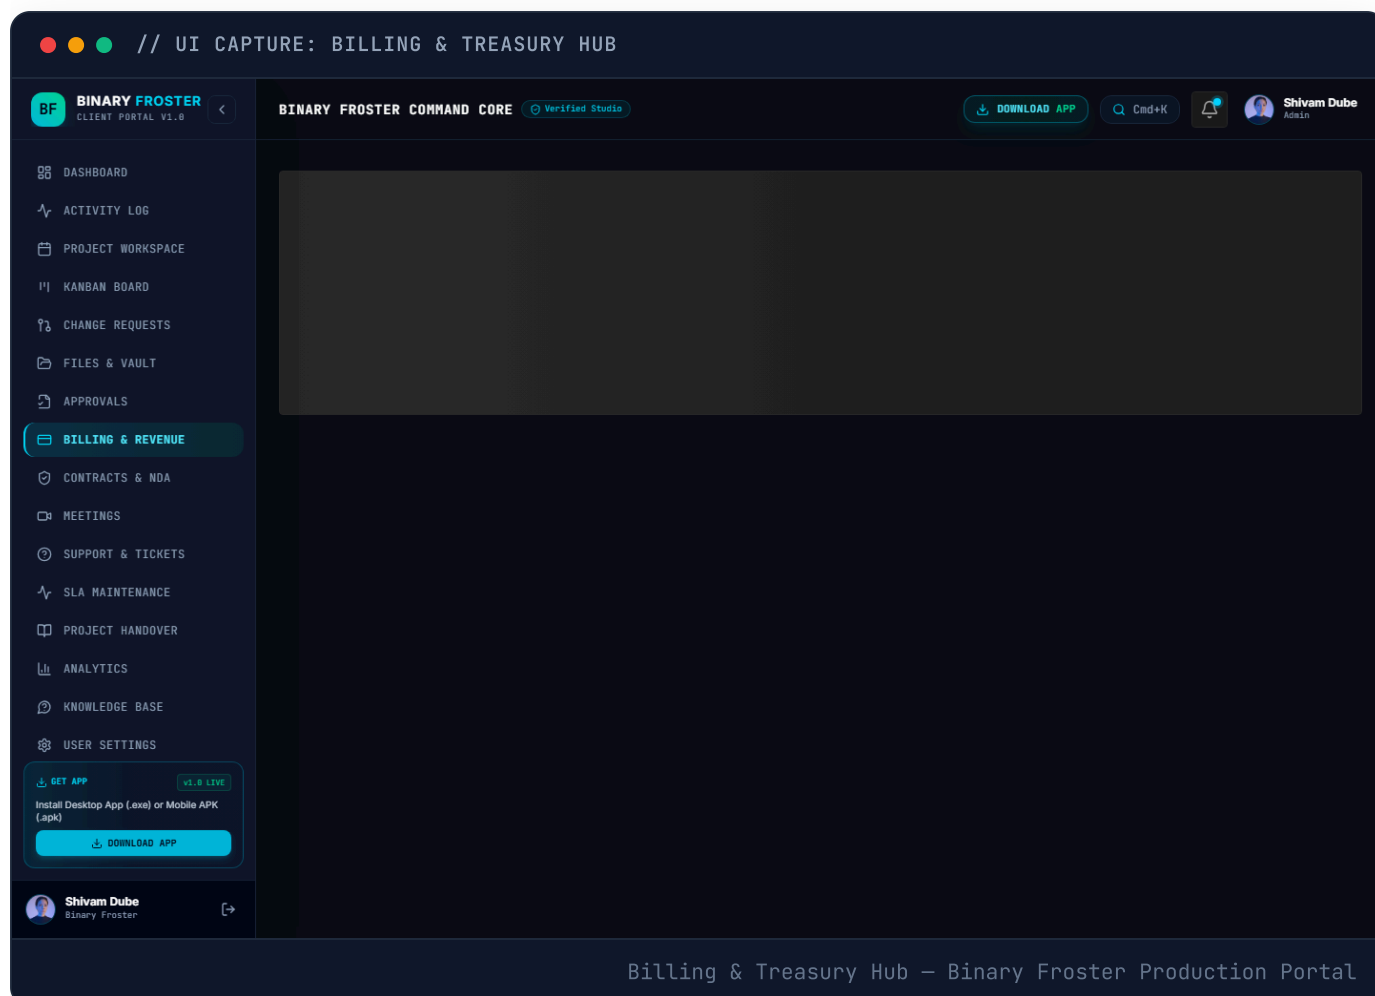

Key Functionalities:

- Formal Sign-off ([Approve & Lock])** : client_admin users can approve deliverables, creating a permanent tamper-evident audit stamp with timestamp and reviewer identity.
- Revision Requests**: If an artifact requires changes, click [Request Changes] to attach screenshots and specific feedback. The task transitions back to the engineering team.
- Audit Trail**: Every revision, comment, and sign-off is preserved in the deliverable history log.

2.5 Billing, Treasury & Invoices ([/billing](#))

Manage all project finances, inspect line-item breakdowns, download official PDF tax invoices, and settle milestones securely.

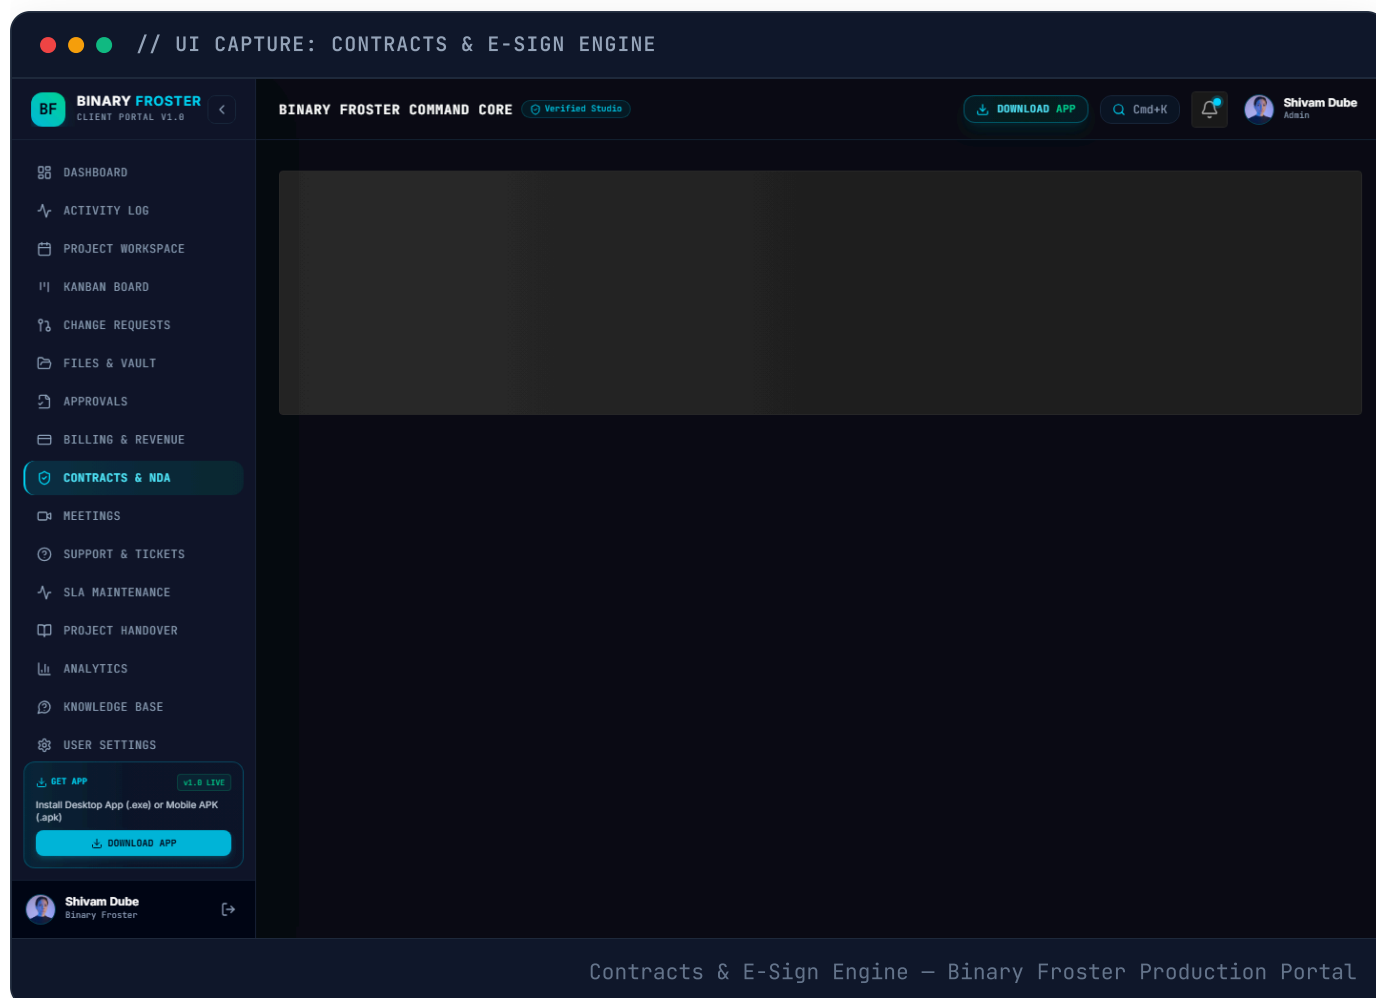

Key Functionalities:

1. **Instant Checkout ([\[PAY_NOW\]](#))** : Authorized `client_admin` users can click to open the integrated Stripe and Razorpay payment checkout.
2. **Export Financial CSV**: Download complete financial histories with one click for corporate accounting and tax filing.
3. **Print Official PDF Receipts**: Generate clean, printable PDF tax invoices with Binary Froster branding and tax calculation breakdowns.

2.6 Legal Contracts & Cryptographic E-Sign ([/contracts](#))

All Master Services Agreements (MSA), Non-Disclosure Agreements (NDA), and Statements of Work (SOW) are digitally stored and executed here.

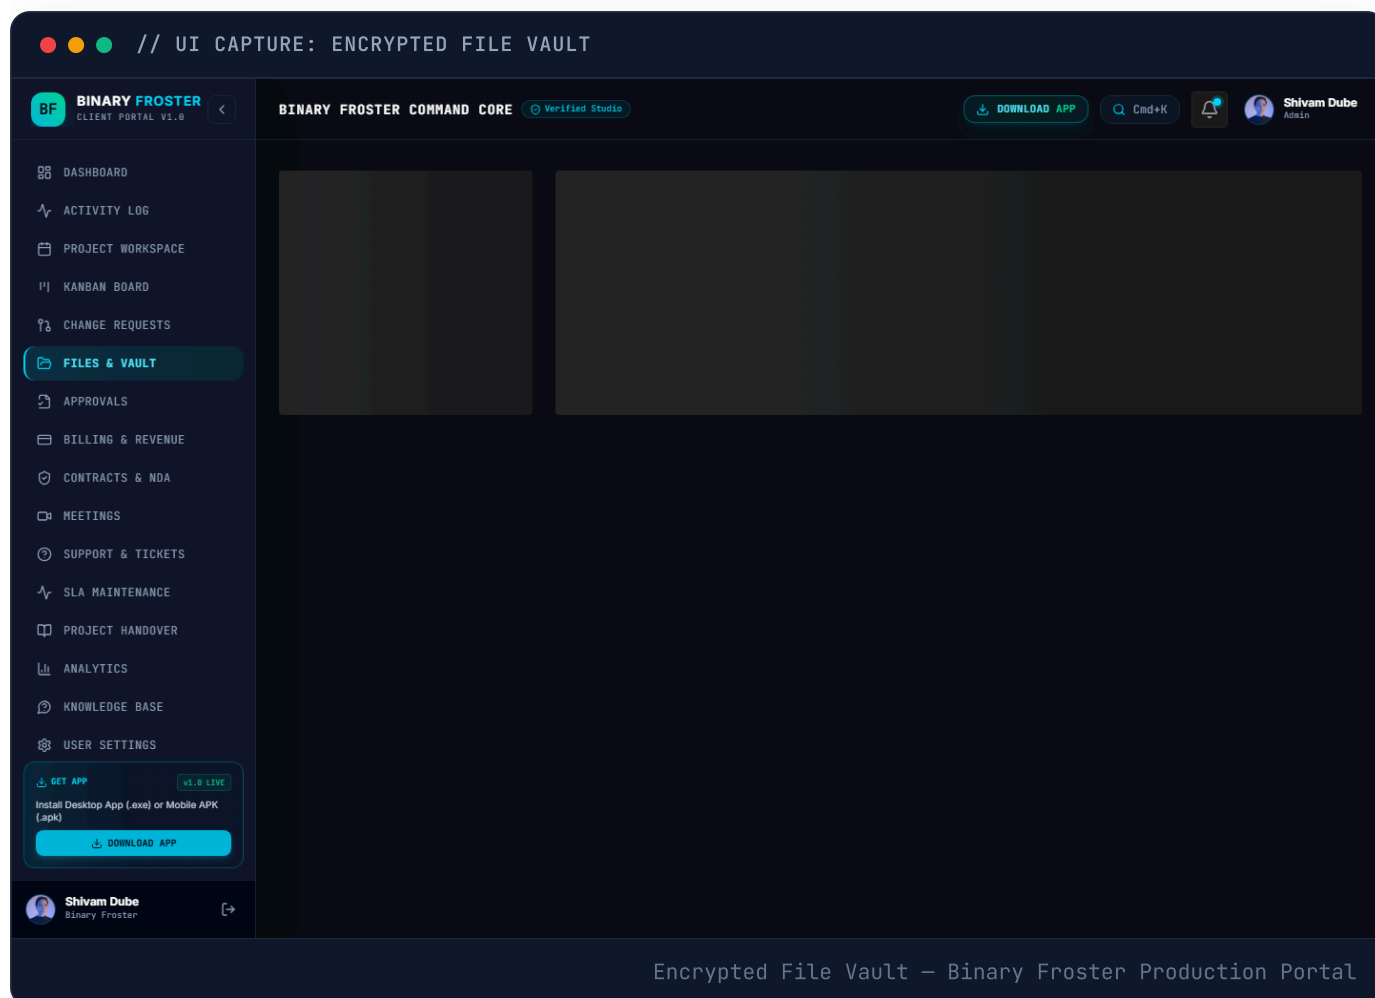

Key Functionalities:

- ESIGN-Compliant E-Signature Drawer:** Authorized `client_admin` users type their legal name and accept terms to execute agreements.
- Cryptographic Audit Seal:** Records the signatory's IP address, UTC timestamp, and digital verification seal.
- Read-Only Mode for Team Members:** Non-signatory users can read contract terms safely with e-sign actions locked.

2.7 Phase-Scoped File Vault (/files)

Securely access and download project deliverables, design assets, and technical documentation organized by project phase.

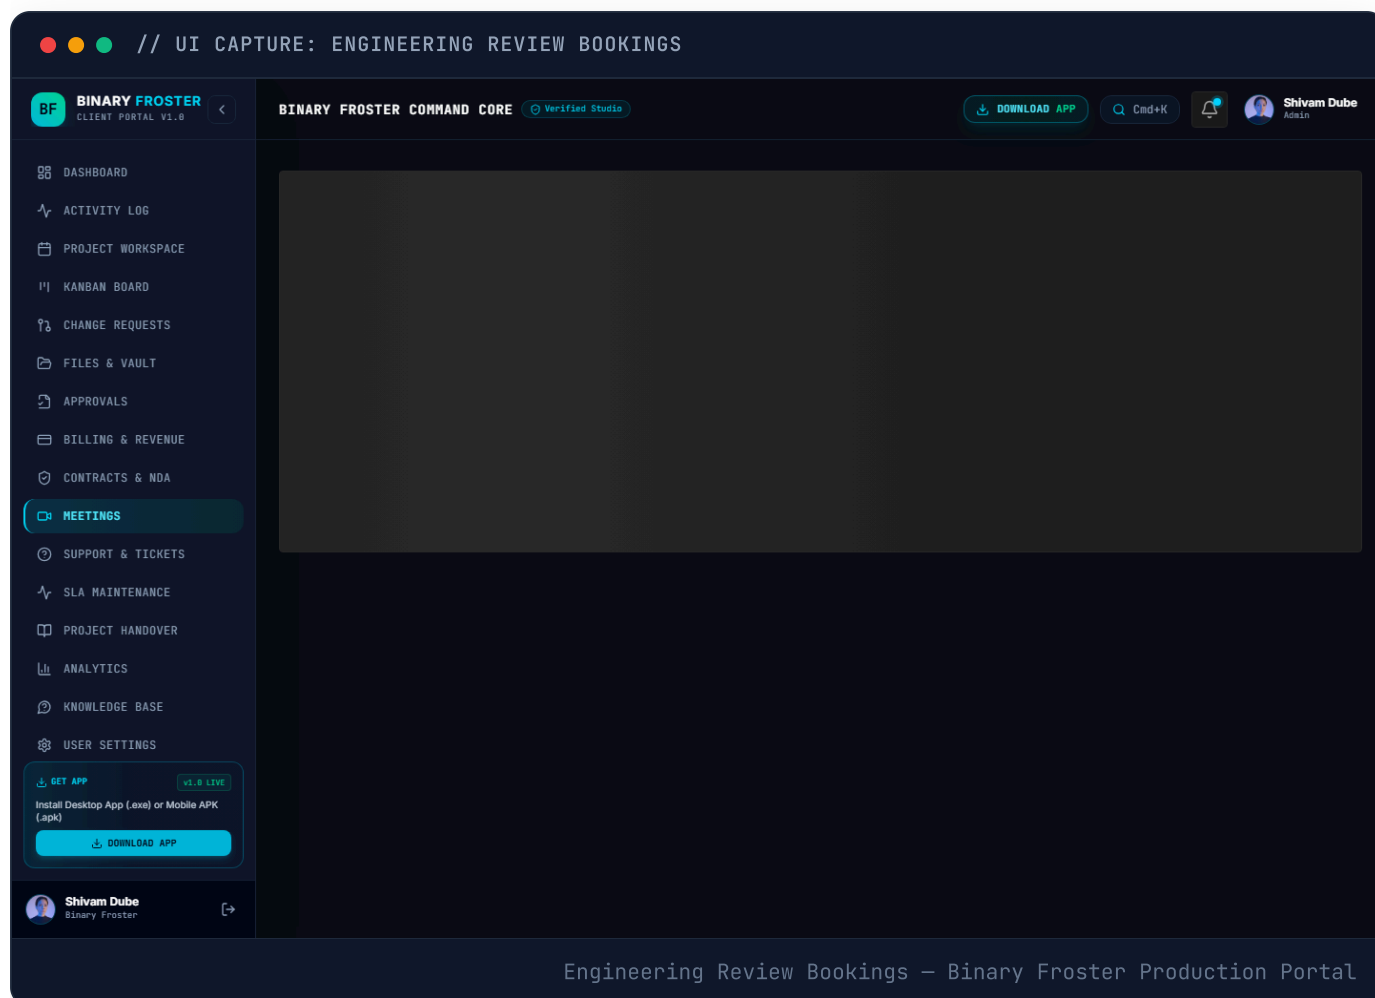

Key Functionalities:

- 1. Phase Categorization:** Assets are segregated into Discovery, Design, Build, and Launch directories.
- 2. Encrypted Uploads:** Upload brand guidelines, API schemas, and proprietary datasets directly to our encrypted storage.
- 3. Direct Asset Preview:** Inspect images, specifications, and source packages without leaving the portal.

2.8 Engineering Reviews & Bookings (/meetings)

Direct scheduling integration for milestone demos, sprint planning sessions, and executive check-ins.

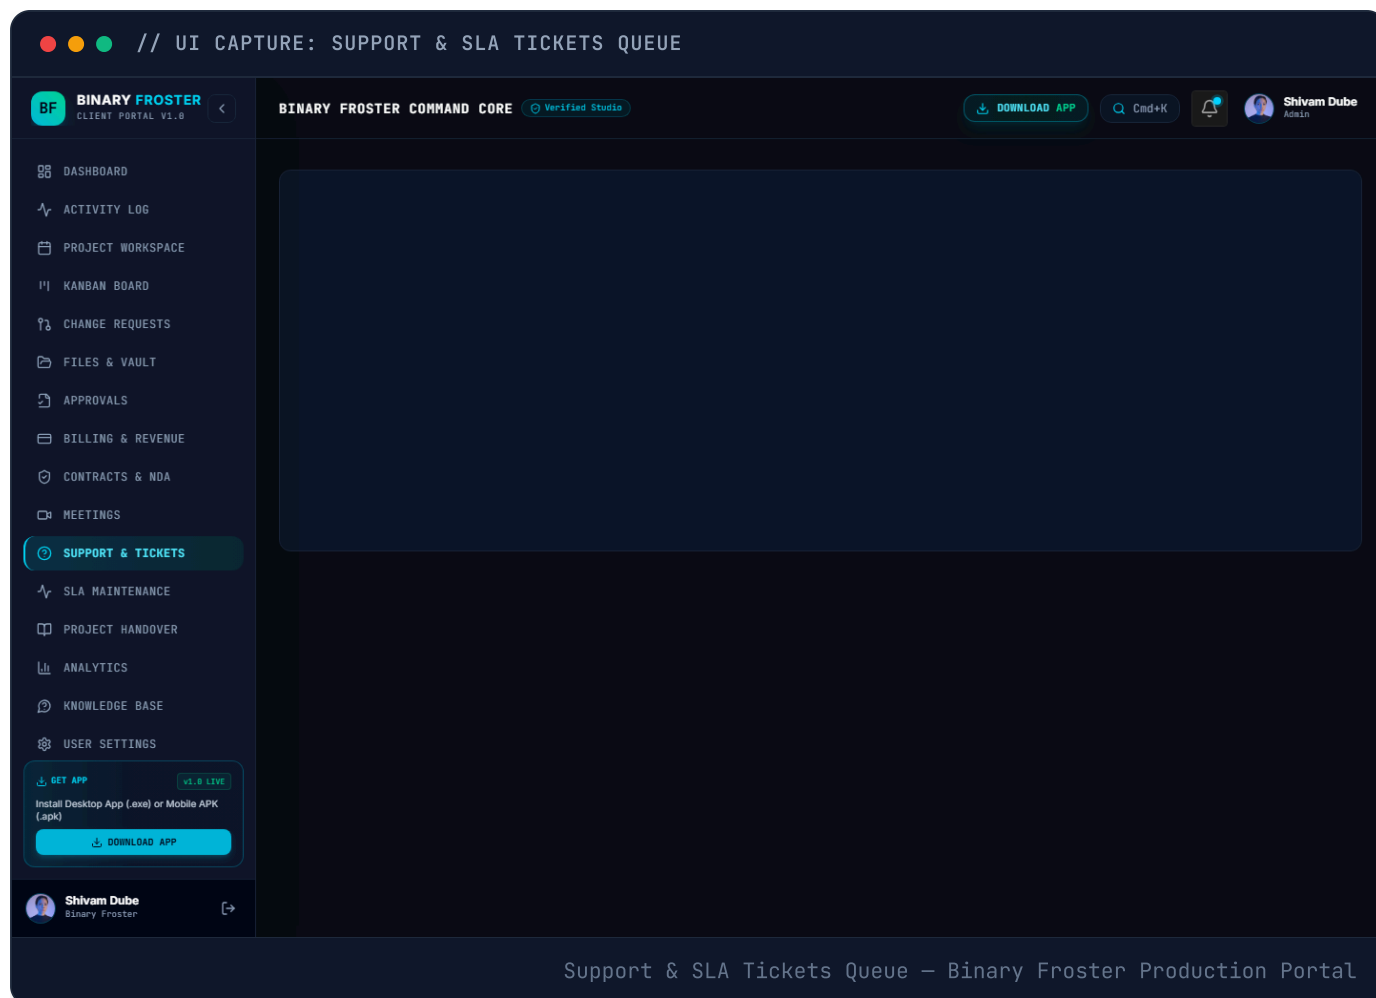

Key Functionalities:

- Cal.com & Zoom Integration:** Book sprint reviews directly against founding engineers' calendars with automatic timezone detection.
- Upcoming Call Cards:** Review scheduled demo dates, agenda items, and one-click Zoom meeting links.
- Meeting Minutes Archive:** Access past review summaries and action items.

2.9 Support & SLA Incident Tickets (/tickets)

Submit production bug reports, infrastructure questions, and change queries directly to the engineering triage queue.

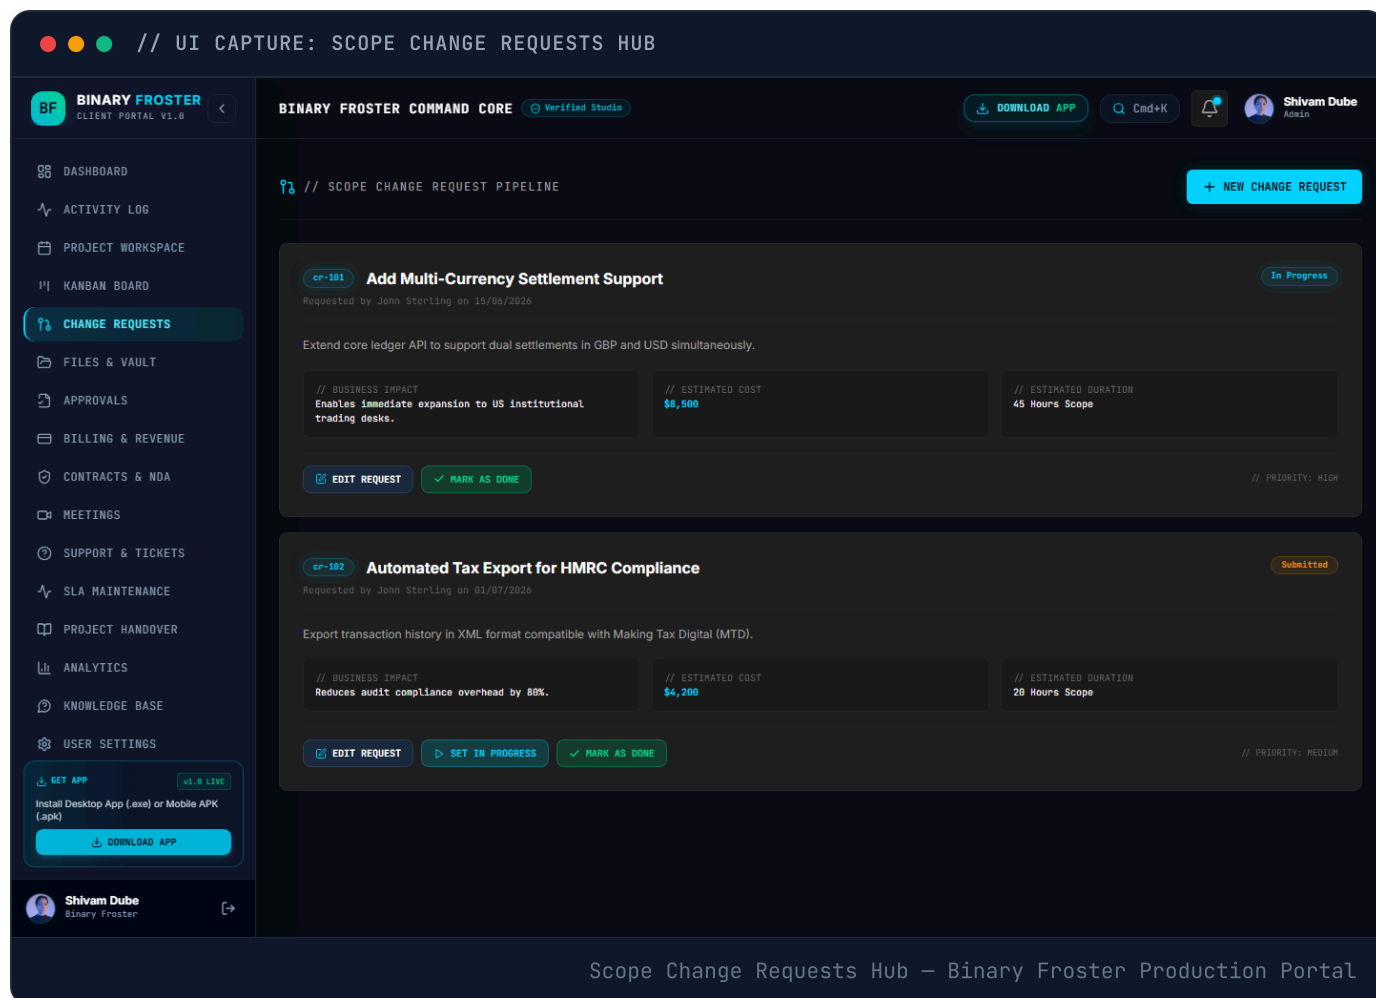

Key Functionalities:

- 1. Tiered Severity Classification:** Select urgency (P1 Critical Blocker, P2 Major, P3 Minor, P4 Inquiry) with guaranteed SLA response times.
- 2. Threaded Engineer Chat:** Reply directly inside ticket threads with Binary Froster support engineers.
- 3. Live Resolution Stamps:** Track when an issue transitions from Open → In Progress → Resolved .

2.10 Scope Change Requests (</change-requests>)

A transparent mechanism for proposing features beyond original contract boundaries without project stalls.

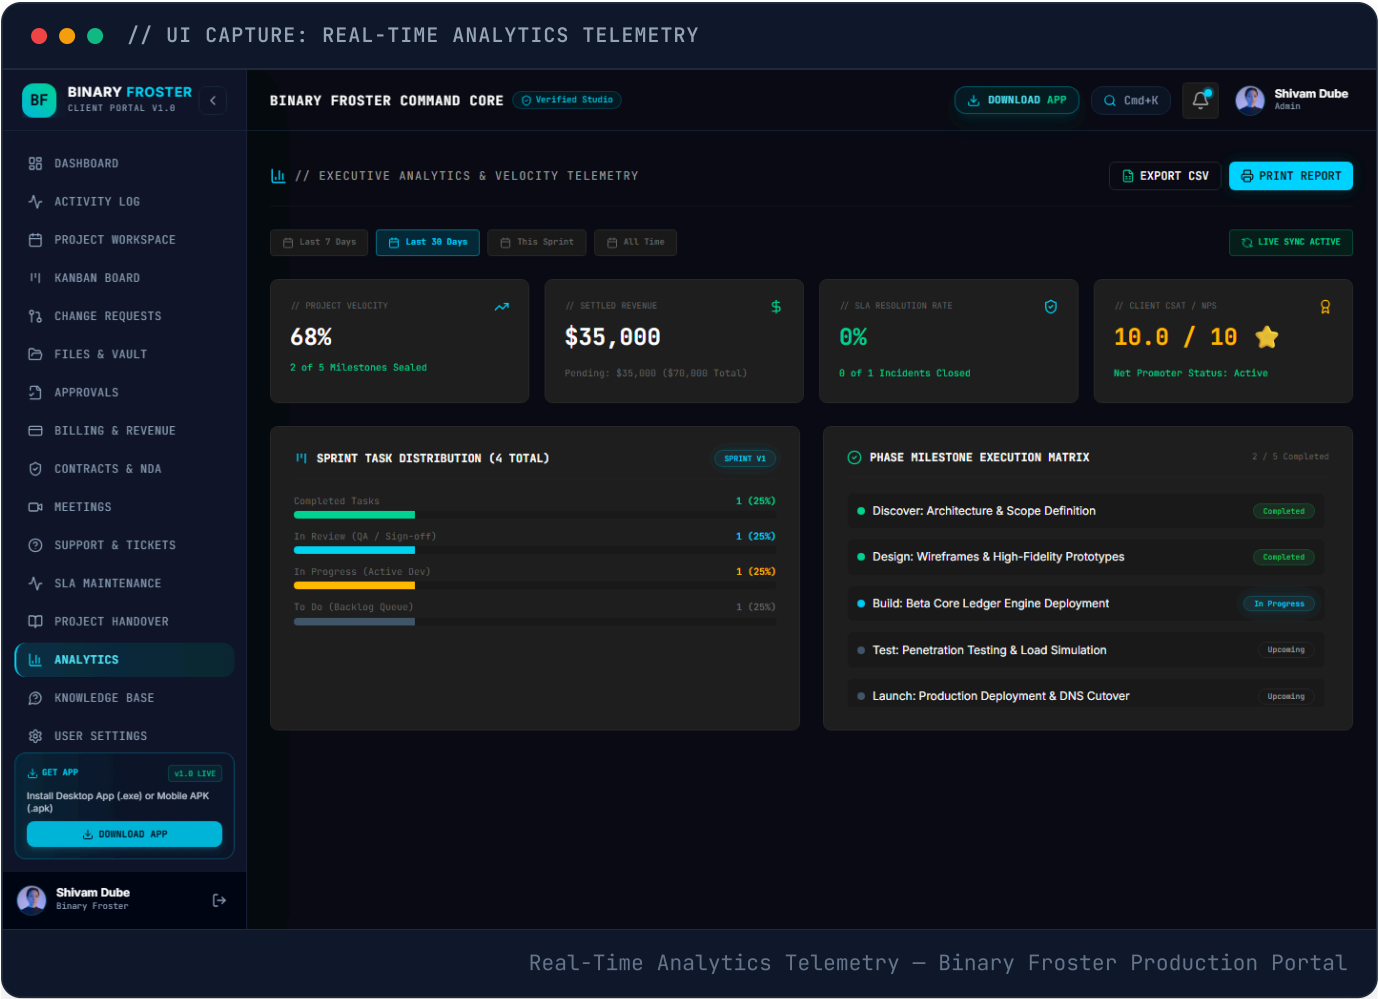

Key Functionalities:

1. **Submit Change Request:** Describe the desired amendment, business objective, and urgency.
2. **Engineering Estimates:** Binary Froster provides an itemized estimate of required engineering hours, timeline impact, and cost.
3. **Dual Approval Lock:** Requires mutual confirmation before scope and budget adjustments are incorporated.

2.11 Real-Time Analytics & Telemetry (</analytics>)

Monitor engineering velocity, infrastructure uptime, and API latency metrics through live telemetry graphs.

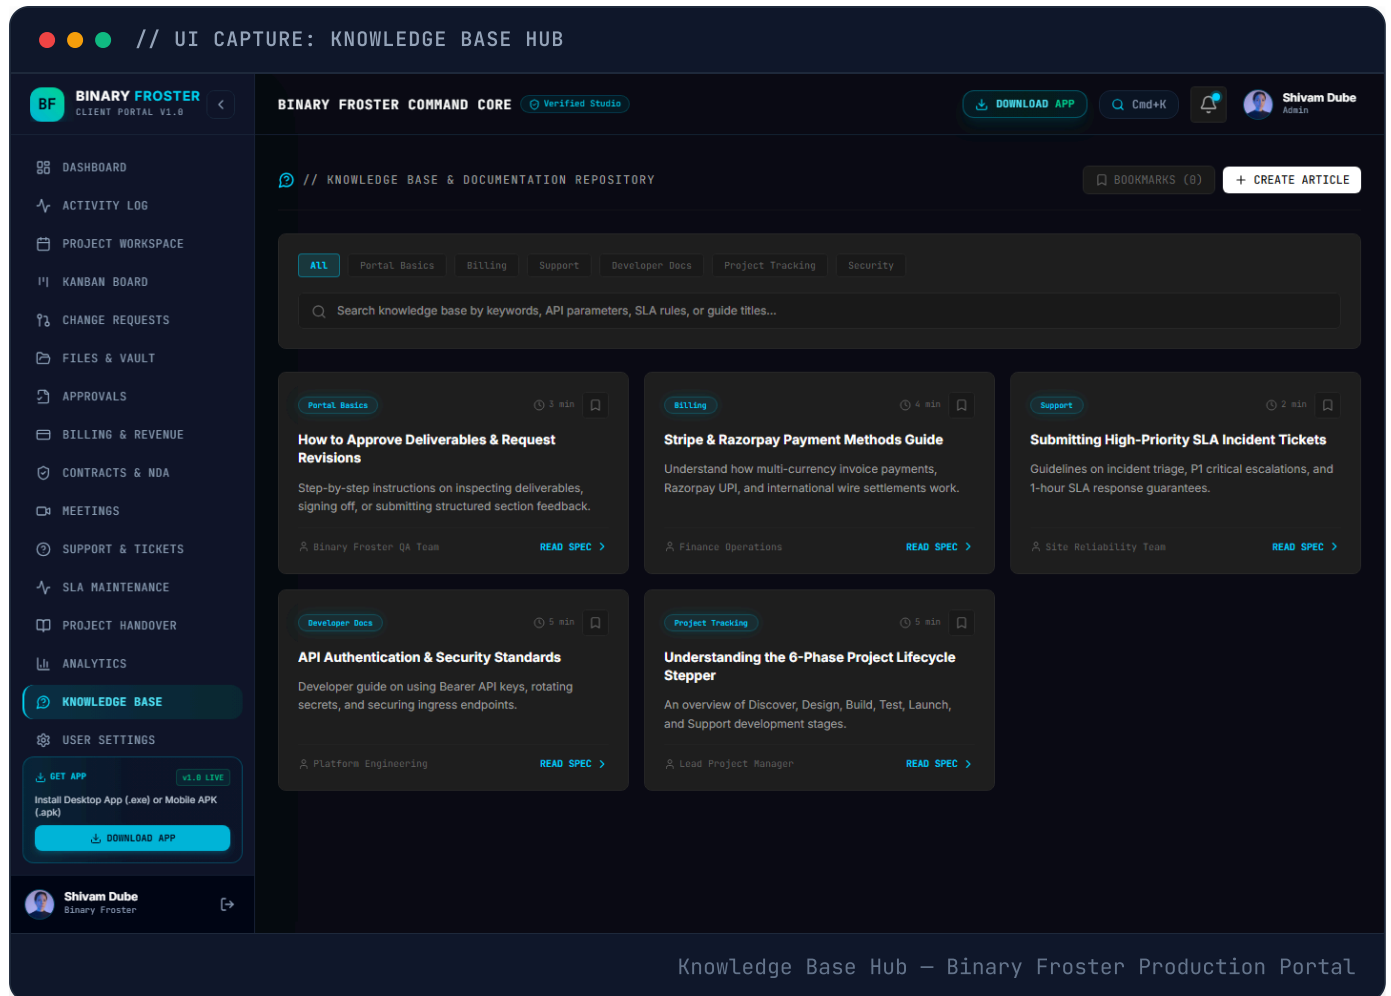

Key Functionalities:

- 1. **Sprint Burndown Tracking:** Inspect planned vs. actual story point completion across development sprints.
- 2. **24/7 SLA Uptime Telemetry:** Live uptime percentage graph verifying your 99.9% system availability.
- 3. **API Performance Metrics:** Monitor API response times, request throughput, and latency distribution across regions.
- 4. **Code Quality & Test Coverage:** View automated test pass rates and security audit compliance scores.

2.12 Knowledge Base & Technical Runbooks (/knowledge-base)

Your permanent repository of architecture blueprints, API documentation, and deployment guides.

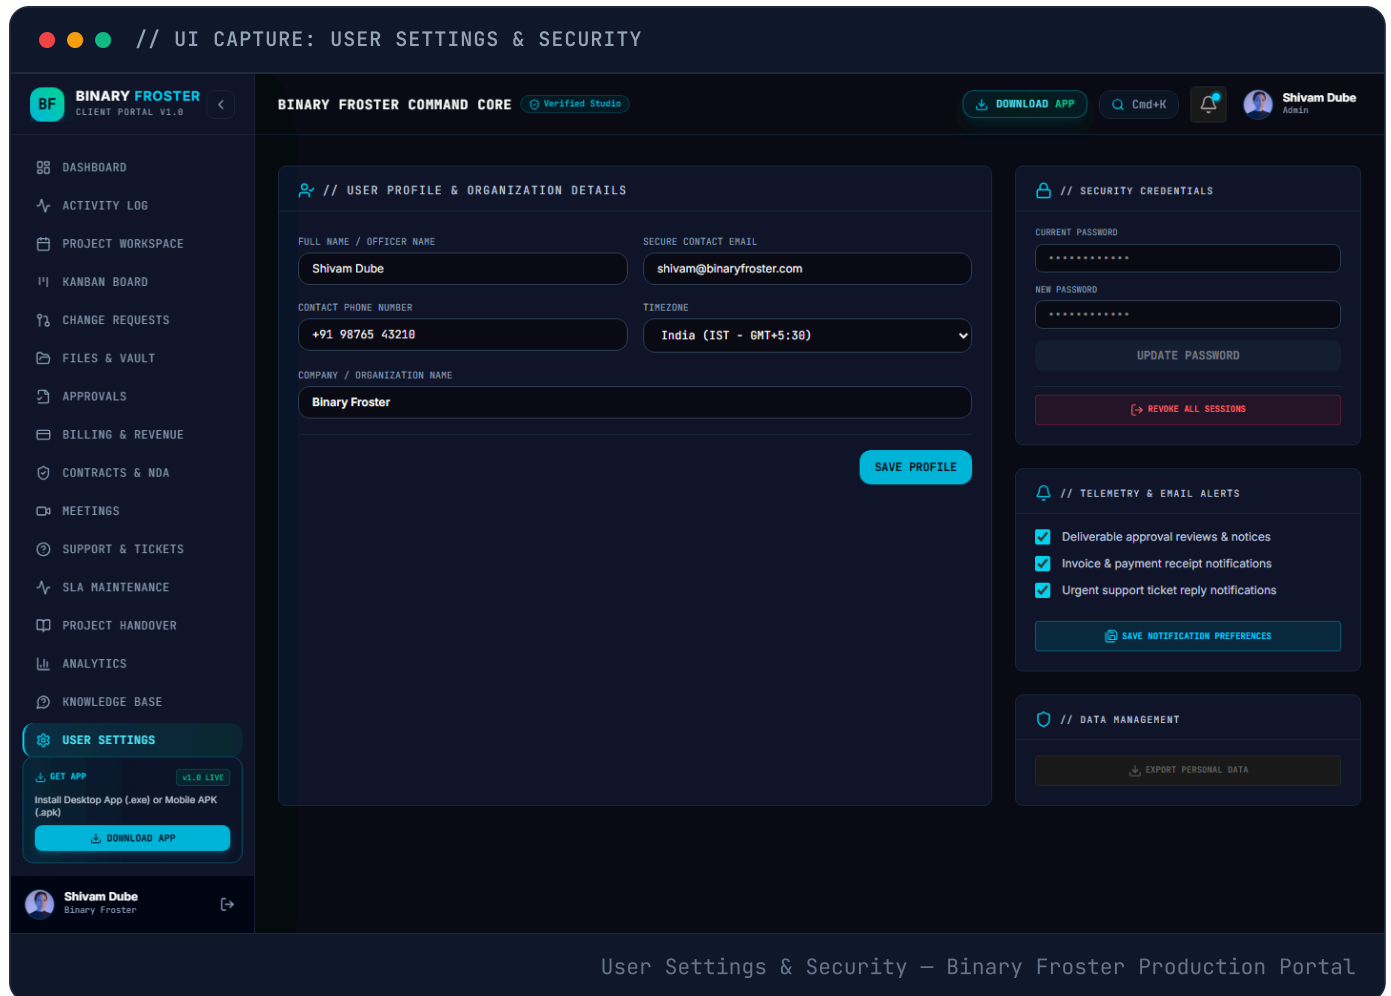

Key Functionalities:

- Instant Full-Text Search:** Search across architectural decisions, setup guides, and system documentation.
- Categorized Runbooks:**
 - *Architecture & Data Models:* Schema definitions and microservice blueprints.
 - *Deployment & CI/CD:* AWS/GCP cloud configurations and Docker container specifications.
 - *Security & Compliance:* SOC2 and GDPR compliance runbooks.
- Copyable Code Snippets:** Quick-copy curl commands, SDK initialization blocks, and environment configurations.

2.13 User Profile & Security Settings (/settings)

Manage your team profile, notification delivery preferences, and account security.

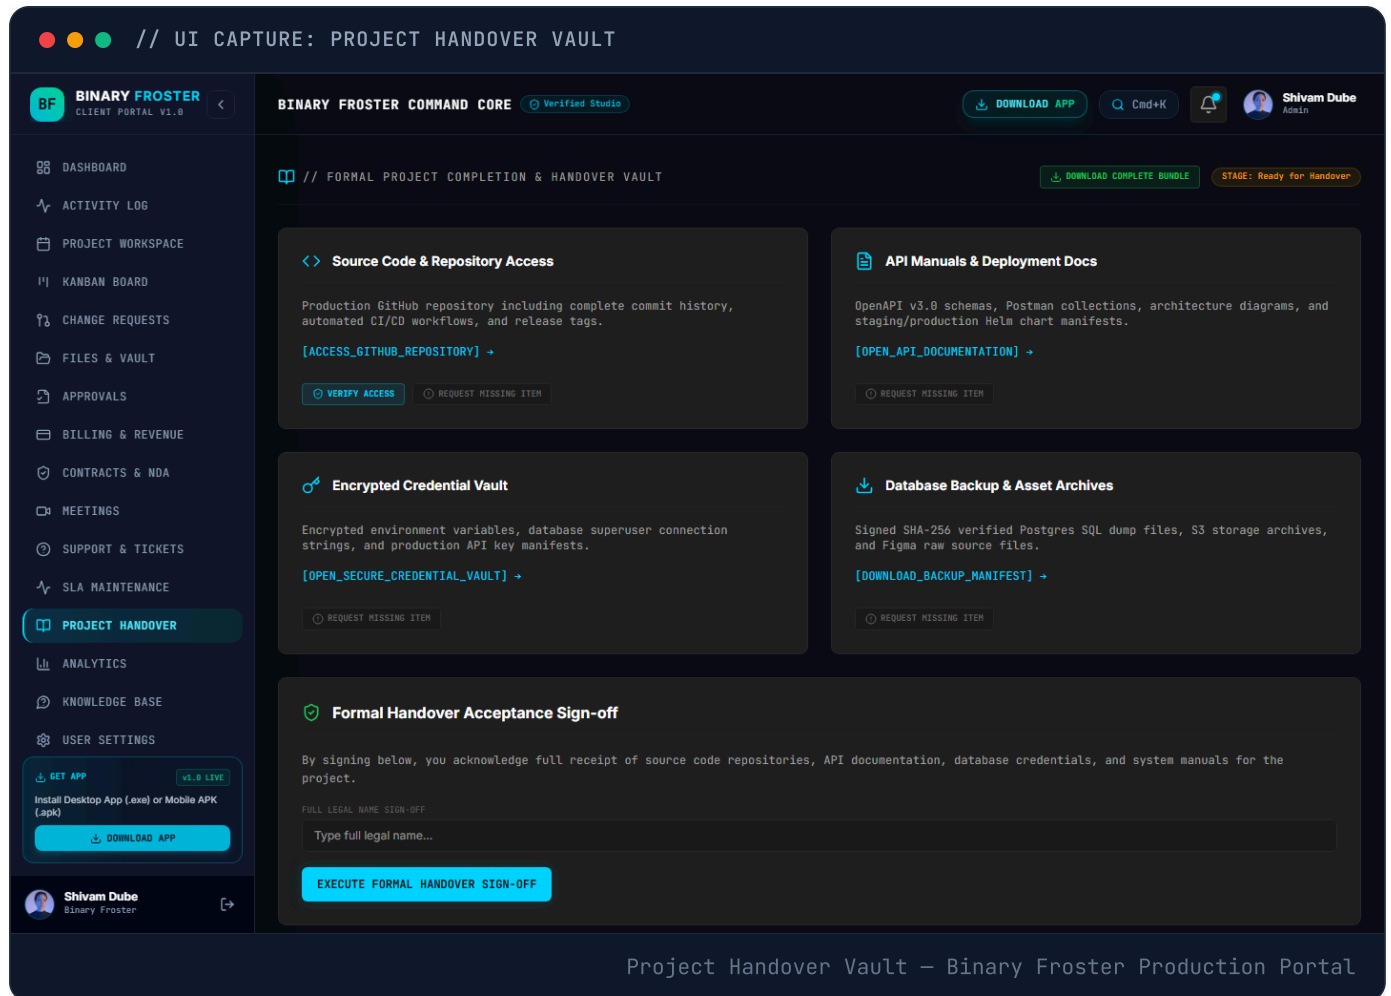

Key Functionalities:

- 1. Profile Information:** Update your official legal name, corporate email, phone, and organization profile.
- 2. Timezone Calibration:** Sync your portal timezone (UTC, EST, GMT, IST) for accurate sprint deadlines and meeting bookings.
- 3. Two-Factor Authentication (2FA):** Secure your account with Google Authenticator or standard TOTP apps.
- 4. Notification Channels:** Configure real-time alerts for deliverable approvals, invoice issuances, and ticket replies.

2.14 Production Project Handover ([/handover](#))

The final phase of your engagement, ensuring all code, intellectual property, and cloud assets are transferred smoothly.

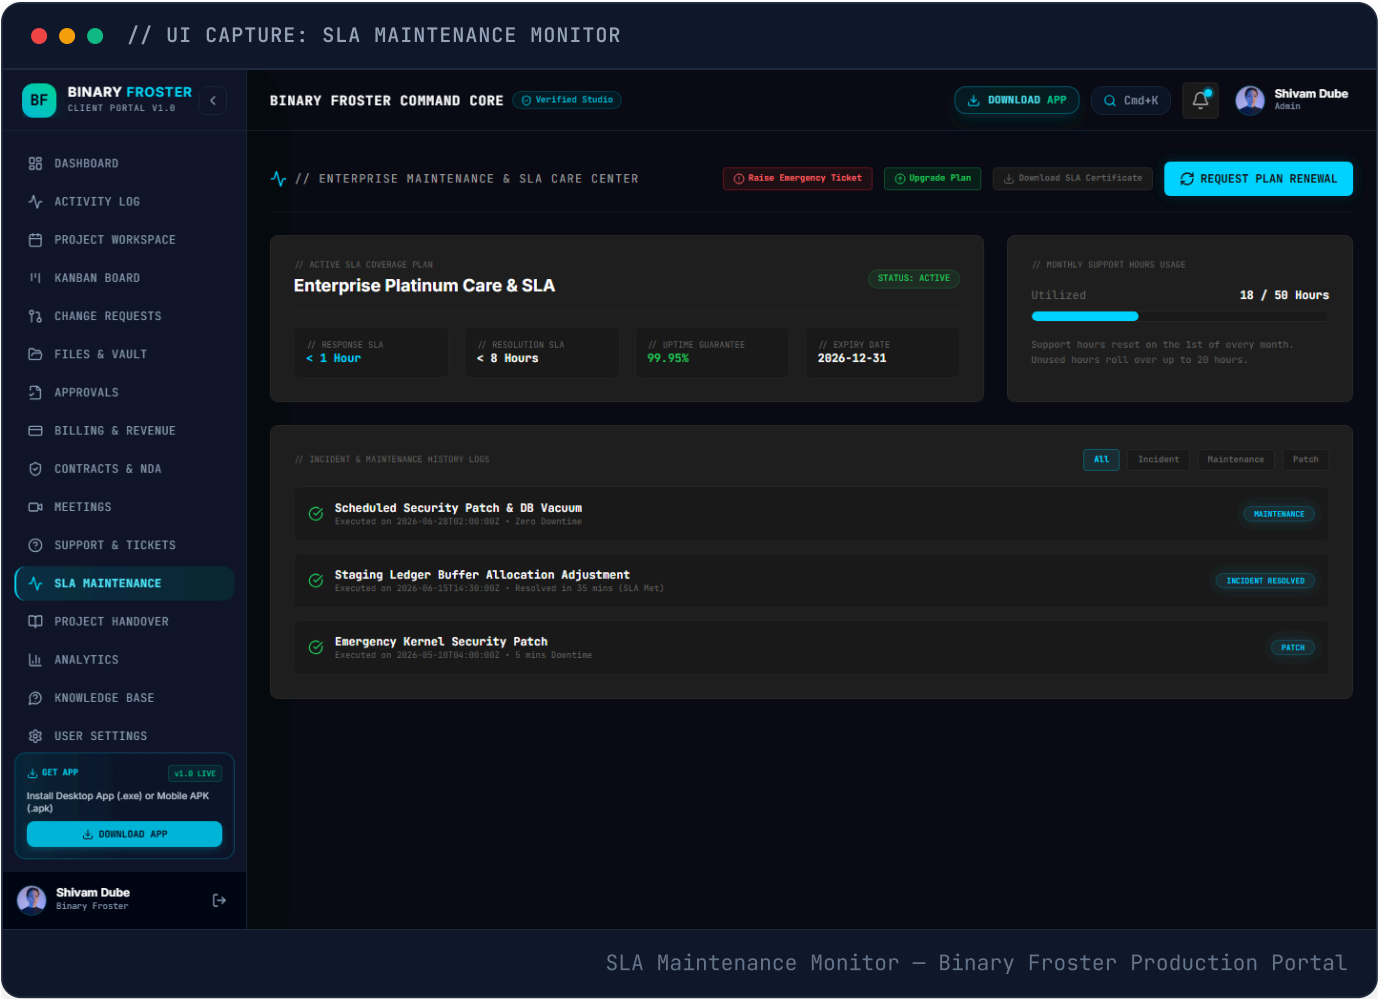

Key Functionalities:

1. **Handover Checklist:** Track completion of DNS cutover, cloud credential transfers, and repository ownership handover.
2. **Intellectual Property Release:** Formal verification that all proprietary code and designs belong 100% to your organization.
3. **SLA Transition Agreement:** Seamlessly transition from active build into 24/7 maintenance mode.

2.15 SLA Maintenance Monitor (/maintenance)

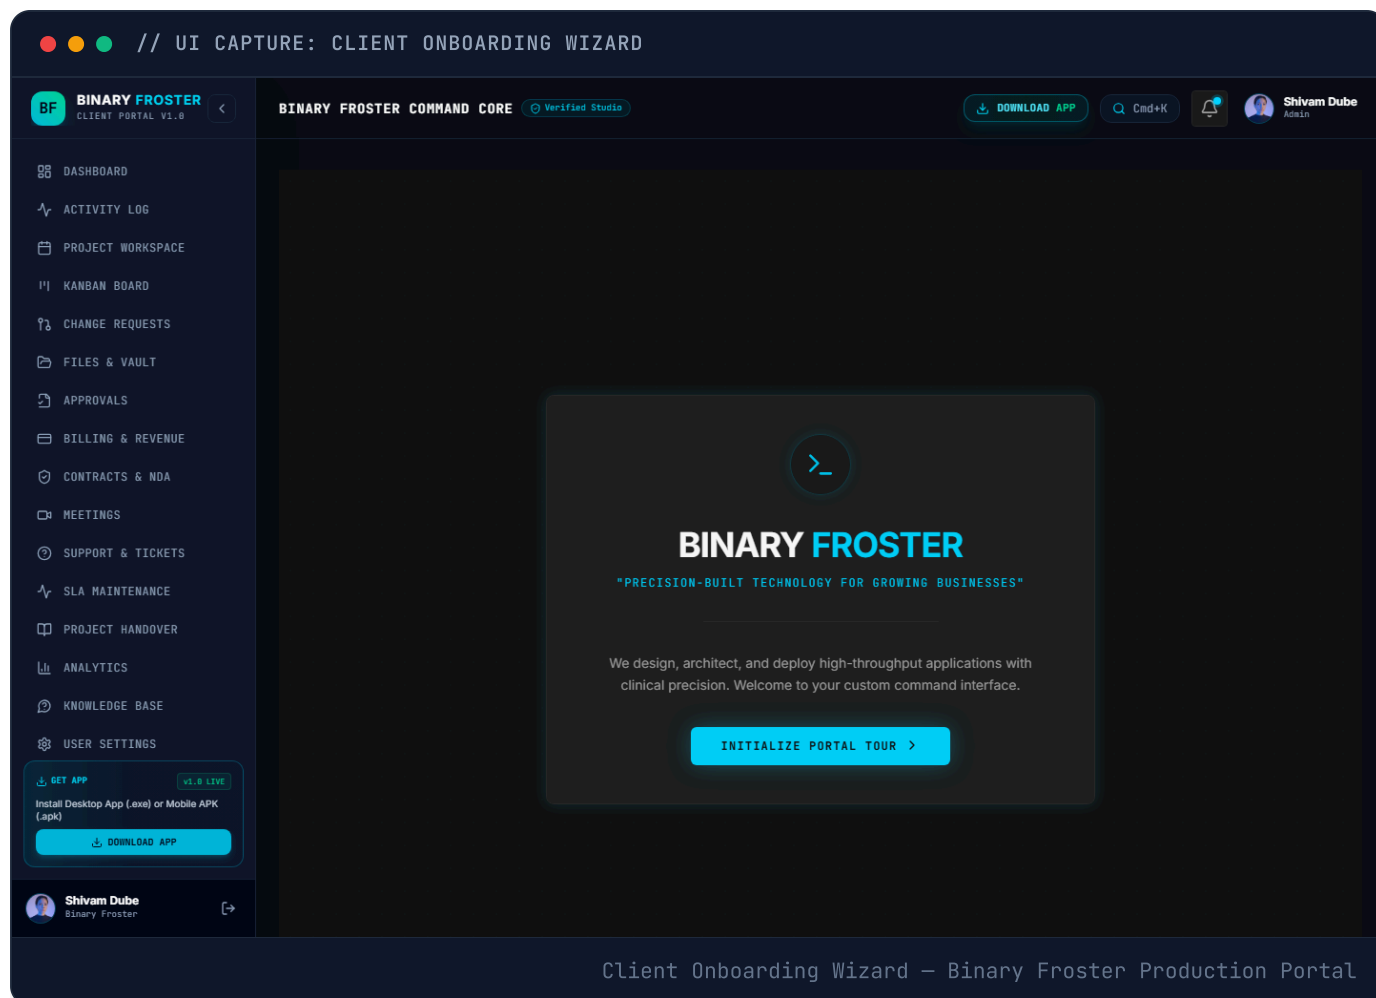

Continuous operational health monitoring for post-launch systems under active support contracts.

- #### Key Functionalities:
- 1. **Uptime Percentage Monitor:** Real-time ping diagnostics across production services.
 - 2. **Scheduled Maintenance Alerts:** Notice of planned infrastructure upgrades and patching windows.
 - 3. **Emergency Incident Escalation:** Direct priority hotline for P1 outage reports.

2.16 Client Onboarding Wizard (/onboarding)

An interactive 4-step intake wizard designed to guide new clients through their first 15 minutes on the portal.

Key Functionalities:

1. **Step 1: Welcome & Studio Introduction:** Meet founding partners and understand core delivery expectations.
2. **Step 2: Guided Tour:** 3-screen visual overview of the Dashboard, Project Workspace, and Communication Threads.
3. **Step 3: Profile & Timezone Sync:** Confirm contact phone number and preferred working timezone.
4. **Step 4: Initial Asset Provisioning:** Upload brand assets or API credentials to bootstrap your discovery phase.

3. Client Onboarding Checklist: First 48 Hours

To ensure a smooth project kickoff, we recommend completing this 4-step checklist within your first 48 hours:

- [] 1. Log in to <http://localhost:3000> using your invitation credentials
- [] 2. Visit </settings> to set your Timezone and enable Two-Factor Authentication (2FA)
- [] 3. Visit </contracts> to review and e-sign your Master Services Agreement & NDA

[] 4. Visit /meetings to schedule your official Phase 1 Kickoff Workshop

4. Summary of Global Keyboard Shortcuts

SHORTCUT	ACTION
Cmd + K / Ctrl + K	Open Global Command Palette for instant page navigation and quick actions
Esc	Close any active modal, dialog, or drawer
Tab / Shift + Tab	Navigate between form inputs and interactive tables

Questions or Technical Inquiries?

Submit an urgent ticket at [/tickets`](http://localhost:3000/tickets) or message our founding engineers directly via the portal.
